

Advanced Vehicle Telematics

Telogis Fleet

Intelligent Decisions for your Fleet

Improve operations, asset utilization and driver safety with enterprise GPS software that offers you a reliable, scalable, and comprehensive view of your fleet. Give IT and business stakeholders the right tools to be successful with GPS across the enterprise, with flexible APIs and GPS hardware options.

Telogis Fleet will help you:

Reduce:

- Fuel costs
- Unauthorized vehicle usage
- Driver overtime hours
- Risk & exposure to liability
- Insurance premiums

Improve:

- Vehicle maintenance
- Route optimization
- Employee productivity
- Driver & vehicle safety
- Customer service

Reduce labor and fuel costs by minimizing idle time and total mileage while getting the same quantity of work done.

Top 10 reasons to buy

- 1 Most reliable technology on the market in use in over 60 countries.
- 2 Most easily-learned and user-friendly fleet tracking tool available.
- 3 See an immediate Return on Investment (ROI).
- 4 Telogis Fleet is both hardware and carrier agnostic.
- 5 Backed by world-class customer service and 24/7 support.
- 6 Cost effective solution that integrates with existing applications.
- 7 The Customer Solutions team will get you up and running quickly.
- 8 Web interface with no special software required.
- 9 We offer 24 months of data storage.
- 10 Telogis is a partner you can trust.

▲ Spatial Clustering

With the fastest maps available, see an entire fleet of thousands of vehicles on one screen and quickly drill down to a single vehicle (in lightning speeds).

▲ Advanced Enterprise Dashboard

Manage an entire fleet of thousands of vehicles with custom hierarchy levels, trending graphs and customizable KPIs to monitor fleet and operational performance.

▲ Satellite Imagery

Get the most current and comprehensive sub-meter earth imagery commercially available, with new images being collected and uploaded every day.

▲ Custom GIS Content Layers

Layer content that matters to you such as power lines, sewer lines, land use grids, forestry, cell towers, parcel data, you name it.

Additional Features

Routing with Optimization

2-Way Live Messaging
